U.S. FOREIGN TRADE
WATERBORNE EXPORTS and GENERAL IMPORTS
JULY 1971

UNIVERSITY OF FLORIDA LIBRARIES DEC 1971 DOCUMENTS

FT 985-71-7
October 13, 1971

U.S. DEPARTMENT OF COMMERCE / Bureau of the Census

Trade Area, District, Port, Type Service, and U.S. Flag

This report presents information on the segment of U.S. foreign trade that is exported or imported by vessel. Data have been compiled from Shipper's Export Declarations (Commerce Form 7525-V) and import entries during the regular processing of statistical data on foreign trade shipments and reflect the physical movement of waterborne foreign trade shipments into and out of the U.S. Customs area (includes the 50 States, the District of Columbia, and Puerto Rico), with certain exceptions as indicated. Both export and import statistics exclude data on shipments between the United States and Puerto Rico, between the United States and its possessions (including the Virgin Islands), and between U.S. possessions and foreign countries. They also exclude shipments made by mail or parcel post (including such shipments transported by vessel), exports and imports of vessels moving under their own power or afloat, shipments of household goods or personal effects belonging to travelers, and other transactions that are not considered exports or imports for statistical purposes (such as temporary exports or imports). Data on merchandise shipped in transit through the United States are included in tables E-1 and I-1 and excluded from other tables. Shipping weight figures represent the gross weight of shipments, including the weight of containers, wrappings, crates, and moisture content, but excluding the weight of lift vans, cargo vans, and similar substantial outer containers. Additional information regarding the export and import statistics is given below.

Exports

The value shown in the export statistics is defined as the value at time and place of export. It is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port of exportation. Transportation and other costs beyond the U.S. port of exportation are excluded.

Effective September 1970, sampling procedures have been reinstituted for estimating data on shipments valued $251-$499 to countries other than Canada. (Data for such shipments were fully compiled during January-August 1970, but sampling procedures were in effect for these shipments during October-December 1969 and for shipments valued $100-$499 prior to October 1969.) Therefore, effective September 1970, the statistics on waterborne exports of domestic and foreign merchandise and non-Department of Defense shipments of Special Category commodities to countries other than Canada reflect fully compiled data for shipments valued $500 and over combined with estimated data for shipments valued $251-$499, based on a 50-percent probability sample of such shipments. For exports to Canada there has been no change in compiling procedures and the statistics continue to reflect fully compiled data for shipments valued $2,000 and over combined with estimated data for shipments valued $251-$1,999, based on a 10-percent probability sample of such shipments. Data on shipments valued under $251 are excluded from the statistics on waterborne exports presented in this report.

Vessel export shipments are credited to the port at which the merchandise was laden on the exporting carrier. The figures for exports of domestic and foreign merchandise (as indicated by column headings in table E-1 and as presented in tables E-2, E-3, E-4, and E-5) include nongovernment shipments, shipments to U.S. civilian government agencies, and government-financed economic assistance shipments under the Foreign Assistance Act. Excluded from the figures on exports of domestic and foreign merchandise (in addition to the exclusions previously mentioned) are shipments of supplies and equipment to U.S. military forces for their own use, shipments of Department of Defense controlled cargo under foreign aid programs, and all shipments of Special Category commodities (commodities for which detailed information may not be released for security reasons).

The figures for Department of Defense and Special Category non-Department of Defense controlled cargo (shown in tables E-1, E-6, and E-7) represent consolidated data for shipments of Department of Defense controlled cargo under special foreign aid programs, such as Department of Defense Military Assistance Program--Grant-Aid, etc., shipped on commercial or military vessels (vessels owned and operated by the Department of Defense) and shipments of Special Category commodities not controlled by the Department of Defense. Since the commodities currently under security restrictions do not include those of the type that would normally be carried on tanker vessels, separate information is not presented for exports of Department of Defense and Special Category shipments on tanker vessels. A list of the Special Category commodities may be obtained from the Bureau of the Census.

For sale by the Bureau of the Census, Washington, D.C. 20233. Price 10 cents per copy. Annual subscription (FT 900, 975, 985, and 986 combined) $3.00.

Imports

General imports are the total of entries for immediate consumption and entries into customs bonded storage and manufacturing warehouses. In addition to the exclusions mentioned previously, vessel import figures exclude American goods returned by U.S. military forces for their own use and imports arriving on vessels owned and operated by the Department of Defense. The statistics presented in this report also exclude data on shipments valued under $251 reported on both formal and informal entries. (Informal entries generally contain items valued not more than $250.)

The value shown in the import statistics is defined generally as the market value in the foreign country, and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Sections 402 and 402a of the Tariff Act of 1930, as amended. Vessel import shipments are credited to the customs district and port at which the merchandise was unladen, not necessarily the district or port at which the merchandise was entered into warehouse or entered for immediate consumption.

Types of Vessel Service

Liner service is that type of service offered by a regular line operator of vessels on berth. The itineraries and sailing schedules of vessels in liner service are predetermined and fixed. Irregular (or tramp) service is that type of service afforded by vessels, other than tanker vessels, that are chartered or otherwise hired for the carriage of goods on special voyages. Vessels in this type of service are not on berth and their sailing schedules are not predetermined or fixed. Tanker vessels are primarily designed for the carriage of liquid cargoes in bulk. All others are classified as dry cargo vessels.

Foreign Trade Areas

The foreign trade areas shown in this report are defined in Schedule R, Classification and Definitions of Foreign Trade Areas (copies available from the Bureau of the Census). Exports by vessel are credited to the foreign trade area in which the merchandise was unladen, imports are credited to the trade areas in which the merchandise was laden. The countries of destination or origin of merchandise are not necessarily located within the trade areas to which the merchandise is shipped or from which it is received.

U.S. Coastal Districts

The U.S. coastal districts are defined as follows:

a. North Atlantic--Includes ports along the eastern seaboard from the northern boundary of Maine to the southern boundary of Virginia.

b. South Atlantic--Includes ports along the eastern seaboard from the northern boundary of North Carolina to, but not including, Key West, Fla. Also included are all ports in Puerto Rico.

c. Gulf--Includes all ports along the Gulf of Mexico from Key West, Fla., to Brownsville, Tex. inclusive.

d. South Pacific--Includes all ports in the States of California and Hawaii.

e. North Pacific--Includes all ports in the States of Oregon, Washington, and Alaska.

f. Great Lakes--Includes all ports bordering upon the Great Lakes and their connecting waterways as well as all ports in the State of New York on the St. Lawrence River.

In-Transit Shipments

Information on merchandise shipped in bond through the United States in transit from one foreign country to another without having been entered as an import is shown in tables E-1 and I-1. The waterborne outbound and inbound in-transit statistics include (1) foreign merchandise transferred from one vessel to another in the U.S. port of arrival and shipped to a foreign country without being released from customs custody in the United States, and (2) foreign merchandise arriving by vessel at one U.S. port, shipped through the United States under customs bond, and leaving the United States by vessel from a port other than that at which it arrived. In addition, the waterborne outbound in-transit statistics also include (1) foreign merchandise withdrawn from a general order warehouse for immediate export by vessel or for transportation and export by vessel (such merchandise was not recorded as an import when it entered the warehouse), and (2) foreign merchandise shipped via vessel from a U.S. Foreign Trade Zone to a foreign country (such merchandise is deposited in the Foreign Trade Zone without being entered as an import).

Any inbound or outbound in-transit merchandise moving by methods of transportation other than vessel is excluded from the in-transit statistics. Thus, merchandise arriving at the United States by vessel and leaving by some other method of transportation is included in the inbound data only. On the other hand, merchandise arriving by other than waterborne transportation and laden aboard vessels upon departure is included only in the outbound statistics. The inbound and outbound segments, therefore, do not counter-balance one another and are complementary only insofar as they involve merchandise carried by vessels to and from the United States.

Symbols Used in the Tables of This Report:

- Represent zero.

B Percent not shown when base is less than half of the unit of measurement shown.

Z Less than half of the unit of measurement shown; less than 0.05 percent.
